Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 July 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 24-33 is/are pending in the application.

DETAILED ACTION

Response to Amendment

The claim objections have been withdrawn in view of the amendment filed 07/09/03.

Specification

The disclosure is objected to because of the following informalities: Applicant is reminded to include a statement of priority to the parent U.S. application to which applicant is claiming priority.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 24-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Bron (U.S. Patent No. 4,428,397).

Bron discloses a flow regulator comprising a membrane (6) having at least one hole (20) above a bottom layer/floor, a fluid pathway (shown by the arrows) wherein flow causes deflection of the membrane to deflect and engage at least a portion of the

Art Unit: 3763

bottom layer. The Examiner is taking the position that the membrane is functionally capable of performing the claimed limitations. See fig. 1. The channel is considered 16.

Claim Rejections - 35 USC § 102

Claims 24-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Société Anonyme André Citroën (French Patent No. 1,299,719).

Société Anonyme André Citroën disclose a flow regulator having a membrane 94) having at least one hole (5) and a bottom layer. The flow path is shown by the arrows in Fig. 1. The membrane is shown as deflecting.

Allowable Subject Matter

Claim 29-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 32-33 are allowable over the prior art of record.

Response to Arguments

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., is a fluid pathway) are interpreted broadly. Although the claims are interpreted in

Art Unit: 3763

light of the specification, limitations from the specification are not read into the claims.

See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993):

Applicant has not claimed any structural distinguishing features which would overcome the prior art. Applicant's claims have been interpreted broadly. A fluid pathway can be interpreted as any space which fluid flows through, to or from. With respect to the "impeding" language, any structure which would narrow the path or redirect the path of the fluid is considered to impede the fluid pathway such that functionally, *Societe Anonyme Andre Citroen* still reads on the claimed invention. Again, applicant's language has been broadly interpreted and functionally the fluid pathway has been impeded. The intended use of a device imposes no limitation to the claim in the absence of distinguishing features.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

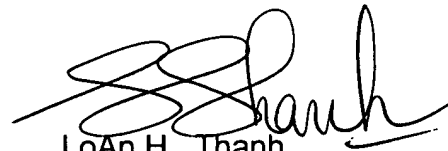

Art Unit: 3763

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
